Autumn Price List
of
Hardy Liliums
Dutch Bulbs
and
Native American Plants

1941

OFFERED BY

WILLIAM N. CRAIG

Front Street at Federal

WEYMOUTH, MASS.

Telephone Weymouth 1110

A very cordial invitation is extended to all interested in hardy Gardening to look over our establishment at any time. With the passing of winter we have a steady succession of bulbous flowers not only in spring and summer but running well into the fall at which latter season Colchicums, autumn flowering Crocus, Sternbergias and late Liliums are to be seen in flower.

Additional to Bulbous plants we have fine collections of Hardy Herbaceous Perennials including many Rock Plants, these always include numbers of the new and less common varieties. For exhibits of these made before the Massachusetts Horticultural Society many gold and silver medals and other awards have been made.

We carry Roses in 175 varieties also choice evergreen and deciduous trees and shrubs including a number of unusual kinds. Large flowered Clematis are another specialty of which we have a collection of 25 varieties.

Our Spring Catalogue amongst other items contains fine lists of tender bulbous plants such as Amaryllis, Tigridias, Zephyranthes, Galtonias, Tuberoses, Acidantheras, Montbretias, Anemones and Hymenocallis.

PLEASE NOTE

WHERE BULBS ARE DESIRED BY PARCEL POST A SMALL ADDITIONAL SUM SHOULD BE INCLUDED TO COVER COST OF POSTAGE. WE ARE ACCUSTOMED TO MAKING LONG DISTANCE SHIPMENTS NOT ONLY TO DISTANT PARTS OF THE UNITED STATES BUT TO EUROPE, SOUTH AMERICA, SOUTH AFRICA AND AUSTRALIA.

SPRING CATALOGUE READY IN FEBRUARY WILL BE GLADLY FORWARDED ON APPLICATION.

LILIUMS

These are one of our leading specialties of which we grow a large collection. Varieties like candidum and testaceum are ready in August while numerous varieties can be planted in September and during October which latter is probably the month par excellence for the greatest number of varieties. November is an admirable month in which to plant such late flowering Lilies as sulphureum, speciosum, auratum, Formosanum, tigrinum and other varieties. Fall is a vastly better season for planting lilies than spring but at the latter season moderately good results can be had with regale, Henryi, speciosum, Henryi, umbellatum, elegans and a few other varieties.

Very successful Lily plantings can be made in December and January. If ground is mulched to exclude some of the frost and plantings made at that time they will be sure to give much stronger spikes than if work is delayed until spring. Many kinds, including virtually all European and North American varieties, do very poorly spring planted and even of the Asiatic varieties some will lay dormant for a year and usually come up vigorously the next spring.

Drainage is far more important than soils for all Liliiums. Stiff retentive soils can be materially improved by adding fine coal ashes, gravel, coarse sand, peat moss, partly rotted leaves and well decomposed manure. Never use fresh animal or chemical manures for lilies, bone meal is excellent for all varieties and well rotted manure is perfectly safe. All lilies love leaf mold and most of them like peat moss.

Lilium candidum enjoys a well sweetened soil and ought not to be covered over 2-2½ inches. Varieties like the umbellatums, elegans, tenuifolium, martagon, amabile and various other kinds with small bulbs should be planted 4-5 inches deep while heavy stem rooting varieties like Henryi, sulphureum, regale, speciosum, auratum, Hansoni and many North American lilies succeed best with 8-10 inches of soil over them. It is good policy to place a layer of coal ashes or coarse sand below bulbs at planting time and some above them. A mulch of peat moss or old rotted manure as a summer mulch is good for all lilies. Lilies do not need much winter mulching, in sections where obtainable cranberry tops are admirable as the wind does not move them. Other suggested coverings are salt marsh hay, leaves, and straw. These need boards or some other material to hold them in position.

All lilies will grow in full sunshine but in partial shade, flowers will last longer and hold their color better. A number will succeed well in open woodlands. None should be planted very near coarse growing perennials. Watering should be looked upon rather as a necessary evil than an advantage, heavy waterings will often start rotting of the bulbs. In cutting lily stalks, leave a moderate piece of stem, if cut clear to the ground, bulbs will be much weakened. In saving seeds select the strongest plants and leave only one or two pods to each stalk, heavy seed production is very weakening.

The two principal diseases of lilies are botrytis and mosaic. Candidum, testaceum, and sometimes regale and other varieties are affected by botrytis. Spraying with Bordeaux once a week from the time growth starts until bulbs are well formed is a good preventive. Mosaic is a much more deadly menace and being in the bulbs, plants will apparently thrive for a time and then die away. Auratum bulbs from Japan

are usually badly affected. Diseased plants should be taken up and destroyed as there is no cure for it.

We offer again this year American grown auratum bulbs raised from seeds with live active roots which have done splendidly the last two years. We also offer mosaic free bulbs of regale hybrids, centifolium, princeps, Creelmanni Shelburne hybrid and other good lilies which have been thoroughly inspected for mosaic. These cost a little more than the regular stock but are easily worth the difference, carrying many more flowers from smaller sized bulbs.

We would draw attention to our fine selection of Lily seeds, one of the most complete offered in America, many varieties come easily from seeds, others take a number of months. Seedling raising is to be recommended where good stocks are to be built up. Seeds can be started under glass in winter, in cold frames in both spring and fall and outdoor sowings at both seasons have proved very successful even in New England.

The great World War seems likely to shut out the importation of all lilies from Japan whence came most of the supplies of longiflorum, auratum, speciosum, Henryi, Japonicum, Hansoni and others, Great Britain is the only European country from which we can secure any, as a consequence quite a number of varieties will be in very short supply, a few unobtainable. We are fortunate in growing a large portion of the bulbs we offer.

LIST OF HARDY LILIUMS

Each Doz.

- Amabile.** A charming stem rooting Lily blooming in mid-June and attaining a height of 18-24 inches. Color bright red spotted black, and with some chocolate blotches, a very good variety for the rock garden.
.30 each, 3.00 doz., 20.00 per 100
- Amabile luteum.** A charming yellow form, excellent constitution . . 1.00 each, 10.00 doz.
- Auratum Var. Platyphyllum.** Carries broader foliage and the largest flowers of any of the auratums, more lightly spotted than in the type and often entirely spotless50 each, 6.00 doz.
- Auratum Var. Virginale (Wittei).** Beautiful snow white broad petalled flowers, a very lovely variety 1.00 each, 10.00 doz.
- Auratum Platyphyllum.** American grown bulbs from seed, strong bulbs in several sizes with plenty of live, active roots, free from mosaic. Ready the first week in November and advance orders call for a large proportion. Anyone trying these bulbs will surely come back for more another year50-75 cents each, 6.00-7.50 doz.
- Aurelianense.** A grand hybrid between L. Henryi and L. Sargentiae raised in France by M. Debras. A distinct improvement over both parents. Stock very limited.7.50-10.00 each
- Aurelianense Seedlings.** These come in white, cream, orange and yellow tones with intermediate trumpets and Henryi form with greatly increased size. Good flowering sized bulbs 4.00 each

Each Doz.

- Backhouse Hybrids.** Results of crosses by the late Mrs. R. O. Backhouse between martagon and Hansoni. Splendid late June bloomers with much vigor. Stocks are still very light, the demand being far in excess of the supply.
- Brocade.** Very vigorous. Color orange yellow, rosy pink without, interior dotted and marbled pink and chocolate 3.00
- Mrs. R. O. Backhouse.** A superb and very vigorous hybrid, color orange yellow spotted purple 3.00
- Sceptre.** Extremely vigorous, attaining a height of 6 feet. As many as 40 of the star-shaped flowers, which are orange colored with a pinky buff shading, are carried to a stem 4.00
- Sutton Court.** The reflexing orange yellow flowers of this variety are heavily spotted with purple, exterior of petals is shaded with pink and interior with pale yellow. Very robust 4.00
- Bolanderi.** A California lily with reddish purple flowers, spotted dark purple. Something in the way of Columbianum75
- Brenda Watts.** One of Miss Preston's hybrids from the Ottawa Experimental Station, Ontario, Canada. Excellent grower carries numerous large, reflexed, fire red flowers, dotted purplish black, in July. Bulbs as yet very scarce 3.00 each
- Browni Colchesteri.** A very fine form of this trumpet lily which flowers in advance of regale. The large blooms are white, stained purplish externally 1.00 each, 10.00 doz.
- Browni odorum.** This is the original wild form from China where the bulbs are much appreciated for food. There is much substance in the large trumpet shaped pure white flowers which are purplish without. Chocolate anthers. Plant 8 inches deep. Needs perfect drainage 1.25 each, 13.50 doz.
- Bulbiferum.** A native of Central Europe this lily proves to be a good grower in North America. The bright orange red flowers are dotted deep purplish black and tinged or blotched yellow in the centre. Flowers in early June50 5.00
- Burbanki.** A graceful lily of rather uncertain parentage, with pardalinum, Parryi and Washingtonianum in its makeup, similar color to pardalinum 1.00 10.00
- Callosum.** Flowers are orange red, unspotted, reflexed in the same way as superbum and Chalcedonicum, loves full sunshine, blooms late July30 3.00
- Canadense.** A beautiful and graceful native lily succeeding well in either sunshine or shade. Fine either in the garden or for naturalizing. The

	Each	Doz.
drooping reflexing flowers are yellow to reddish in color, heavily spotted within20 each, 2.00 doz.,	15.00	per 100
Extra Big Cultivated Bulbs		
.40 each, 4.00 doz.,	30.00	per 100
Canadense Flavum. The yellow form of the Canadian lily. Succeeds splendidly in full sunshine but will also thrive in fairly heavy shade.		
.25 each, 2.50 doz.,	18.00	per 100
Canadense Rubrum. The red form of this charming lily.		
.30 each, 3.00 doz.,	22.00	per 100
Candidum. The best beloved of all Liliums. Requires a sweet soil and being a bulb rooter covering only 2-3 inches deep. Requires good drainage and while excellent in full sun will stand considerable shade. Dutch and French sources of supply are entirely closed but we can offer splendid bulbs both home grown and English.		
.40-.50 each, 4.50-6.00 doz.,	35.00-45.00	per 100
Candidum Salonikae variety. Blooms some days earlier than the type, has a rather smaller bulb but carries many more flowers per stalk, 20-35 are not unusual. The most disease resistant of the Madonna lilies. Owing to heavy early orders for this form we have only limited numbers left for sale.		
.40-.50-.75 each, 4.50-6.00-7.50 per doz.		
Carolinianum. Similar to superbum but is smaller and less husky, loves sunshine40	4.00
Centifolium. A magnificent new lily of great vigor and hardiness, introduced by the late Reginald Farrer. The immense pure white trumpet shaped flowers are flushed with yellow at the base of the trumpet, outside the trumpets are streaked with green and light brown. Stem rooter and requires deep planting. Good flowering bulbs75c, 1.00, 2.00	each
Cernuum. This Chinese lily has grass-like foliage and very wiry stems. Flowers are lilac rose in color, spotted wine color, fragrant and the plants are similar to tenuifolium in habit. Quite a scarce lily	50c, 5.00	doz.
Chalcedonicum (Scarlet Turks Cap Lily). A native of Greece and one of the parents of testaceum. The brilliant scarlet recurving flowers are produced in July.		
Strong flowering bulbs	1.00-1.50	each
Colchicum (See Monadelphum)		
Columbianum var. Ingrami. A dependable variety from Oregon and other Pacific coast states. The color is golden yellow, spotted red, likes a moist location in summer50	5.00
Concolor. This charming rock garden lily comes to us from Siberia, it is an early bloomer with rich crimson scarlet flowers facing upwards	30c, 3.00	doz.

	Each	Doz.
Concolor pulchellum. Hardier and more vigorous than the type, height rarely over 18 inches, follows tenuifolium in its season of bloom.		
	35c each,	3.50 doz.
Coridion. Resembles concolor in its habit of growth. Color deep yellow with dark spots40	4.00
Creelmanni (Creelman Lily). A superb hybrid raised in Canada between regale and Sargentiae. Intermediate in habit and flower, but much later flowering. Extra fine bulbs75-2.00	each
Croceum. This is the true old orange lily of British gardens where it is seen growing luxuriantly on every hand, grows much taller than umbellatum and blooms later, not infrequently carrying 16-20 flowers to each stem. Color rich orange, one of our very best lilies50	5.00
Crows Hybrids. A splendid race of white trumpet lilies blooming later than regale, somewhat variable in type but containing some grand forms, developed in Canada and possesses wonderful vigor75-1.50	each
Crobellatum. A strong growing cross between croceum and umbellatum blooming in late June and intermediate in character	1.50	
Dauricum. Often called Davuricum, a form rarely seen in gardens, usually some form of umbellatum being substituted for it. Flowers more nearly resemble those of our native Philadelphicum, orange red in color, spotted black and facing upright ..	.30	3.00
Dauricum var. Luteum. A very lovely golden yellow form, scarce ..	1.00 each,	10.00 doz.
Dauricum var. Pardinum. A grand form of Dauricum. Large erect flowers which are rich orange flushed with yellow and apricot, a sturdy grower50	5.00
Davidi (Thayerae). This rather scarce Chinese lily is of graceful habit and while the flowers are similar to those of Willmottiae they are produced later, it has a sturdier stem however. Flowers are cinnabar red in color and the foliage is narrow and grass-like. Extra strong flowering bulbs	1.00	10.00
Second sized bulbs of flowering size.	.50	5.00
Davmottiae. A grand hybrid raised in Canada between Davidi and Willmottiae and distinctly superior to either parent, flowers are similar to those of Willmottiae but it is a better grower than that variety, more graceful and floriferous carrying 35-45 flowers to a stalk	1.00	10.00
Elegans (Thunbergianum). A dwarf growing and early flowering type of lilies coming in several colors. Good both for the border and the rock garden as well as the wild garden. There are some very fine forms of this easily grown lily. Fine mixture.		
	.20 each,	2.00 doz., 15.00 per 100

	Each	Doz.
Elegans Alice Wilson. An excellent yellow form, dwarf and carrying extra large flowers, also forces very well50	5.00
Elegans Aureum Nigro-Maculatum. Apricot yellow with black spots .30 each, 3.00 doz.		
Elegans Atro-Sanguineum. Dark red, crimson in centre30 each, 3.00 doz.	
Elegans Leonard Joerg. A good deep apricot variety with black spots. .30 each, 3.00 doz., 20.00 per 100		
Elegans Mahony (umbellatum Mahony). Rich mahogany crimson, immensely popular. .35 each, 3.50 doz., 25.00 per 100		
Elegans Red Star. Splendid red, suffused with orange30	3.00
Formosanum (Philippinense Formosanum). We are now using the European name for this fine lily, as bulbs of this hardy form are from Formosa and not the Philippines the older name should be dropped. This is the most remarkable lily introduced in late years, its ease of culture with its facility of increase from seeds makes it come within the range of everyone with a garden. Seeds sown early will produce flowering plants easily the same year.		
Early Variety. This starts blooming outdoors as regale finishes, plant 6 inches deep. Height 2-2½ feet.		
Late Variety. Blooms from mid-August until late October, grows taller than the early variety, sometimes 6-8 feet. Price of both forms25 each, 2.50 doz., 18.00 per 100 Extra big bulbs of late variety. .40c each, 4.00 doz.		
Grayi. Named in honor of Prof. Asa Gray, the noted botanist. Coming to us from the mountains of Virginia and North Carolina, this lovely and graceful lily takes kindly to garden culture in New England. The pretty red tubular shaped flowers are yellow, spotted brown and are very freely produced. Prefers some shade like many other lilies, but thrives well in full sunshine35	.350
Giganteum Himalaicum. Not to be confounded with the form of longiflorum going under the name of giganteum, this is the tallest growing and most noble of all lilies. Not a plant for the open garden, the ideal place for it is in an open glade in a piece of woodland where it can be sheltered from strong winds. The large bulbs should be planted shallow in soft mucky ground in which coarse sand has been freely mixed. Fall planting is best. The large tubular shaped flowers are semi-pendant and pure white in color with a purplish tint near the base and		

Each Doz.

purple midribs, the flowers are very fragrant.

Strong bulbs 2.00, 3.00, 4.00

Grace Marshall. Another of Miss Preston's "stenographer" hybrids. Vigorous habit. Deep red reflexed flowers carried horizontally on the stems, sometimes as many as 30 flowers to a stalk. Cover 8 inches.

Stock very limited 3.00 each

Hansonii. Hanson's lily is easily one of the best 6 varieties in cultivation. Leaves are carried in whorls and persist until quite late. The yellow flowers are slightly reflexed, yellow in color with brown spots and fragrant. Succeeds well in both sunshine and shade. A late June bloomer.

Extra large bulbs60 each, 6.00 doz.

Strong flowering45 each, 4.50 doz.

Henryi. Sometimes called the "yellow speciosum." The orange yellow reflexing flowers are produced in August and early September. This lily produces very big bulbs, often attains a height of 7-8 feet or more, and is not only very floriferous but absolutely dependable, carries very rich green foliage. Must be planted 8-10 inches deep for best results. ...25, .40, .60 each

2.50, 4.00, 6.00 doz.

20.00, 30.00, 40.00 per 100

Horsfordi. A splendid hybrid from Vermont between Maximowiczii and Batemannioe, more vigorous than either parent, easily attains a height of 6 feet. An August bloomer. 1.00 each, 10.00 doz.

Japonicum (Krameri). The most lovely of pink Japanese lilies. This has done amazingly well outdoors even when planted as late as Christmas week, many stalks have carried 6-8 flowers each in the open field and unprotected. Give it well drained soil, use plenty of sand around the bulbs. Flowers mainly in July but will persist until well into August. Makes a fine variety also for pot culture.

.50 each, 5.00 doz., 40.00 per 100

Kelloggi. A very dainty and pretty Lily from Northwestern California, the stems attain a height of 2 to 4 feet, flowers are pink spotted purple and are fragrant, likes a well drained position in a rockery, or on the banks of a sloping piece of woodland, flowers in mid-June

.50 5.00

Longiflorum Giganteum ("Estate Lily")
American grown. This special variety has been produced from the scales of one bulb and is now offered for the second season. A very noble variety with immense flowers and attaining a height of 5 feet under glass, a special selection from the Croft strain, very thick petalled, a noble variety, guaranteed mosaic free. Stock limited. 9-11 inch bulbs.

1.00 10.00

Longiflorum Erabu. A variety from the island of Erabu, now much

	Each	Doz.
grown for Easter flowering succeeding in a cooler temperature than giganteum, proves perfectly hardy in New England, blooming in July50	5.00
Marhan. A fine hybrid lily raised between Martagon and Hansonii, has a fine constitution. Flowers are fairly intermediate in character. Good flowering bulbs.	2.00	
Martagon. Purplish flowers in mid-June50	5.00
Martagon Album. A very lovely snow white variety	1.00	10.00
Martagon Cattanae. Deep purple almost black flowers, a very vigorous form	3.00	each
Martagon Dalmaticum. Deep glossy purple, has great vigor, scarce variety	3.00	each
Note: The martagons are European lilies whence come nearly all our supplies. Due to war conditions very few are now arriving and prices are higher.		
Maximowiczii. A late August flowering lily, resembles tigrinum a little in habit and flowers but is a later bloomer and rather less vigorous. The recurving red flowers are spotted purplish brown. Cover bulbs 6-8 inches30	3.00
Maxwill. A splendid hybrid between L. Maximowiczii and Willmottiae, raised in Canada. Has a sturdier stem than Willmottiae and is a little lighter in color. A splendid garden lily	1.50-2.00	each
Medeoloides. A good rock garden lily of martagon habit, flowers are scarlet, shaded apricot and occasionally spotted black50	5.00
Monadelphum Szovitzianum. This lovely European lily carries rich yellow flowers in early June. Bulbs are this year very scarce. We have a limited supply	1.50	each
Ochraceum. Often confounded with Napalense from which it is quite distinct. Shows much variation in both flower and leaf. Color is yellow but not of one fixed shade, usually the tube is heavily stained with wine purple, a fine lily for pot culture and may prove amenable to open air conditions when better understood. Strong bulbs	2.00	each
Pardalinum. A very good Pacific Coast lily flowering in July. Of vigorous habit and easily attaining a height of 5-6 feet. The recurving flowers are bright orange in color spotted with deep crimson25	2.50
Pardalinum Giganteum. A magnificent form with larger and much more brilliant flowers than the type, possesses great vigor. We offered this variety for the first time in the east in 1930 and it has made good everywhere30-.50	each, 3.00-6.00 doz.

	Each	Doz.
Parryi. A lovely Pacific Coast lily growing 4 feet in height. Lemon yellow in color with light chocolate brown spots, has a delicate fragrance. Likes plenty of leaf mold or peat moss and a moist location. Cultivated bulbs are scarce75	8.00
Parvum. A very pretty and graceful Lily from the Sierra Nevada Mountains which succeeds very well in the eastern states. Flowers are recurving, orange yellow in color and 1½ to 2 inches across50	5.00
Parvum Luteum. A pure yellow form which is very highly prized. One of the most charming of our Pacific Coast Lilies50	5.00
Philada. One of Mr. F. L. Skinner's hybrids, a cross between Philadelphicum and a form of Dauricum, very early bloomer, fine constitution. Bright red with purplish spots.	.75	7.50
Philadelphicum. While a rather common native American lily this is not easy to establish in gardens. Prefers some shade. Color is vivid orange scarlet with dark maroon spots.		
Extra large bulbs20 each, 2.00 doz.	12.50 per 100
Phildauricum. Another fine hybrid of Mr. Skinner's, received Award of Merit from Royal Horticultural Society. Robust grower, later than Philada. A pleasing red, suffused gold and splashed purple40	4.00
Philadelphicum X Dauricum Hybrids. A splendid vigorous race raised by Mr. Skinner in Manitoba, all are very early bloomers coming into flower in advance of the umbellatums, they are very distinct and fine additions. The following five varieties can be heartily recommended.	.75	7.50
Azalia. Strong grower, massive clusters of as many as 20-25 flowers, fine for massing, rich apricot flowers75	7.50
Flambeau. Tall grower, very long leaves, flaming red flowers of large size which are 5 inches across and face outwards rather than upwards.75	7.50
Glow. Open cup shaped flowers 4½ inches across, the reddish orange color suggests Philadelphicum75	7.50
Russet. Deep burnt orange flowers, spotted dark brown. Tall grower, flowers come in double and triple whorls75	7.50
Skinner's Orange. Award of Merit R. H. S. 1933. Carries 15-25 flowers per stalk, has broad glossy leaves, flowers are medium orange yellow, brown spots in throat75	7.50
Collection of five Phil-Dauricum hybrids, one strong bulb of each ...	3.50	
Philippinense Formosanum (See Formosanum).		
Pomponium. A native of Italy this lovely lily resembles Chalcedonicum but blooms much earlier. Seems to		

	Each	Doz.
prefer a heavy soil with some grit added and likes lime50	5.00
Pride of Charlotte. An excellent regale X Sargentiae hybrid raised in Vermont, flowers a fortnight later than regale, carries bulbils in the leaf axils, has proved extremely hardy	1.00-1.50	each
Princeps. A hybrid between regale and Sargentiae raised at the Dominion Experimental Farms, Ottawa, Ontario and superior to either parent. We offer fine mosaic free bulbs75-1.50	each, 8.00-15.00 doz.
Pyrenaicum. A fine European lily of the martagon type. Flowers are yellow spotted black. Likes some shade and a year to get established. . .	.75	each, 8.00 doz.
Queen Charlotte. A splendid hybrid raised in Vermont between Davidi and Maximowiczii.		
Strong flowering bulbs	1.00	
Regale. Easily the most largely planted and popular lily in America today. Succeeds under widely different conditions and is hardy, vigorous, floriferous, and absolutely dependable. The fragrant flowers have a delicate pink suffusion with a sulphury throat, externally the colorings show reddish brown through the white.		
Mammoth bulbs, 11—12 in. size	.75	each, 7.50 doz.
Extra big bulbs, 9—11 in. size,	.50	each, 5.00 doz., 40.00 per 100
Large flowering bulbs,	.40	each, 4.00 doz., 30.00 per 100
Good flowering bulbs,	.25	each, 2.00 doz., 18.00 per 100
Roezii. A moisture loving Lily from California, does very well in New England, stem rather slender, leaves long, slender and crowded, flowers are of a clear reddish orange, recurving and dotted maroon50	5.00
Rubescens. This is the Redwood or Chemise Lily. Tall slender stalks and very fragrant tubular flowers, these are white with purple dots when opening changing to deeper purple, and varying shades may be seen on the same plants. Give very good drainage50	5.00
Rubellum. A pretty very early flowering dwarf lily, fine for the rock garden in well drained pockets. The flowers are rather light pink in color and tube shaped, is also fine for pot culture50	5.00
Scottiae. A grand hybrid raised by Mr. F. L. Skinner. Award of Merit R. H. S. 1932. This is a cross between elegans Mahony and Willmottiae, with extra large rich salmon apricot flowers, lightly spotted deep purple, 1.50-2.00 each		
Sargentiae. Mrs. Sargent's lily flowers about three weeks later than regale, the large tubular flowers are pure white within, outside they are reddish brown. Plant at least 8		

	Each	Doz.
inches deep, be sure soil is well drained and this lily will thrive with you although not to the same degree as regale75	8.00
Shuksan. This is the best of the several hybrids raised by the late Dr. David Griffiths between pardalinum and Humboldti magnificum. Does very well in the east proving superior to Humboldti. Strong flowering bulbs	1.50	
Shelburne Hybrid. A very fine and vigorous hybrid between Sargentiae and regale raised in Shelburne, Vermont, resembles a much glorified Sargentiae but is a hardier and huskier grower than that variety. .75-1.00 each, 8.00-10.00 doz.		
Speciosum Album. Large reflexing pure white flowers which are in season outdoors from mid-August until October. Also good for pot culture. .50 each, 6.00 doz.		
Speciosum Magnificum. The large recurving flowers are rich carmine pink, margined white, a very fine variety40-.50 each,	4.00-6.00 doz.
Speciosum Melpomene. Dark carmine shaded purple, heavily spotted and margined white, an extra richly colored form. .50 each, 6.00 doz.		
Speciosum Punctatum. A delightful form, blooming much earlier than all others, foliage suggests auratum platyphyllum. Stock limited. . .	1.00 each,	10.00 doz.
Speciosum Rubrum. Carries both green and dark stems with rose colored flowers of varying shades. .40-.50 each, 4.00-6.00 doz.		
Sulphur-Gale. A fine hybrid between sulphureum and regale, very vigorous and hardy, extends the flowering season for regales. The flowers are in form like sulphureum and approximate regale in color. .50-.75 each, 5.00-8.00 doz.		
Sulphureum. A superb late flowering lily from Upper Burmah which proves perfectly hardy in New England. The immense trumpet shaped flowers are pale yellow within, deepening towards the throat, the outside is tinted brownish red. Is also grand for pot culture. A late blooming variety attaining a height of 5—6 feet. Good flowering bulbs	1.00	10.00
Extra large flowering bulbs	1.50	16.50
Sutchuenense. Somewhat similar to Willmottiae but has a much sturdier stem and the flowers are spotless, an exceptionally fine Lily. .75-1.00 each, 7.50-10.00 doz.		
Superbum. A magnificent North American lily, thrives in sunshine or partial shade, especially fine in rhododendron beds where it will attain a height of 10 feet. The bright orange recurving flowers are heavily spotted, likes a moist soil but de-		

	Each	Doz.
mands good drainage like all lilies.		
Very large cultivated bulbs.		
	.40 each, 4.00 doz.,	30.00 per 100
Strong flowering bulbs,		
	.20 each, 2.00 doz.,	15.00 per 100
Tenuifolium. Our earliest flowering lily each year is the Siberian coral lily. A gem for the rock garden. Graceful foliage and brilliant recurving red flowers carried 6—20 on a stem. This lily, under good conditions, grows 3—4 feet high and we have counted 35 flowers to a stalk. Should be in every collection.		
Extra large bulbs,		
	.40 each, 4.00 doz.,	30.00 per 100
Strong bulbs,	.20 each, 2.00 doz.,	15.00 per 100
Good flowering sized bulbs.		
	.15 each, 1.75 doz.,	12.00 per 100
Tenuifolium Golden Gleam. Usually classed as a hybrid between tenuifolium and martagon album but is more probably a sport, comes true from seed, carries numerous rich orange yellow flowers.		
Fine flowering bulbs,		
	.40 each, 4.00 doz.,	30.00 per 100
Fine flowering bulbs,		
	.25 each, 2.50 doz.,	15.00 per 100
Tenuifolium Red Star. A much glorified tenuifolium, flowers much larger than in the type and less reflexing, color brilliant red	3.00 doz.,	20.00 per 100
Testaceum. The gloriously beautiful Nankeen Lily is the only known natural hybrid lily in existence, a cross between candidum and chalconicum. It should be planted shallow and prefers a well sweetened soil. Should be planted in fall, 4 inches deep; in spring, only from pots. The exquisite nankeen yellow flowers are carried 6—12 to a stalk and open in early July. There is a demand for this lily far in excess of the supply. We have a good stock of bulbs.		
Strong flowering size	2.00	22.50
Good flowering size	1.25	13.50
T. A. Havemeyer. A beautiful American hybrid between L. Henryi and L. sulphureum blooming during August. The flowers which are 6 inches across are semi-trumpet and slightly reflexed of a soft buff shade externally, lined green. Internally at the base of the petals a deep green fading to deep buff, while the tips of the petals are a delightful cream. This is an outstandingly lovely hybrid, vigorous in habit, 4-5 feet high	5.00	
Tigrinum. The old Tiger lily often seen growing splendidly about abandoned homes and along roadsides, gives a fine touch of color in mid-August, splendid for naturalizing.		
	.20 each, 2.00 doz.,	12.50 per 100
Tigrinum Flore-Pleno. A double form which is very pleasing, flowers a		

	Each	Doz.
little later than the single form, rather less brilliant in color30	3.00
Tigrinum Fortunei Giganteum. Ex- tremely vigorous, growing 6 feet or more in height, sometimes carrying 30—50 flowers per stem, color salmon orange spotted deep purple. .30 each, 3.00 doz.,	20.00	per 100
Tigrinum Splendens. An especially fine form with rich deep orange flow- ers, spotted black. By planting in late spring vigorous stalks may be had in flower as late as September 15. .30 each, 3.00 doz.,	20.00	per 100
Umbellatum. Early and very free flowering hybrids, coming in many shades of color, in season during June and early July. Fine mixture. .20 each, 2.00 doz.,	12.50	per 100
Umbellatum Apricot. Of a lovely rich apricot shade, husky grower, carries 8-10 flowers per stalk50	5.00
Umbellatum Darkest of All. Remark- ably fine deep red75	7.50
Umbellatum Feu Brilliant. Rich orange red, extra large flowers, fine variety	.30	3.00
Umbellatum Golden Fleece. A superb variety, large umbellate heads of golden yellow flowers. Vigorous and very effective, a sterling novelty ..	.75	9.00
Umbellatum Grandiflorum. Extreme- ly fine orange red form. .30 each, 3.00 doz.,	20.00	per 100
Umbellatum Mahony (See <i>Elegans Mahony</i>).		
Umbellatum Orange Queen. Rich orange and with extra large flowers. .25 each, 2.50 doz.,	18.00	per 100
Umbellatum Orange King. Large flow- ers of glowing orange with deep red tips40	4.00
Umbellatum Prince of Wales. Early splendid yellow variety, extra large flowers60	6.00
Umbellatum Refulgence. Rich golden orange crimson, tall grower, extra fine30	3.00
Umbellatum Splendidum. The finest of all the highly colored varieties, rich vermilion and orange, very strong grower, carries immense heads of bloom40	4.00
Umbellatum Vermilion Brilliant. Blood red flowers, with crimson shading, lightly spotted black. A grand variety40	4.00
Wallacei. Warm apricot with rose shading, a charming Japanese form of <i>elegans</i> flowering in August30	3.00
Wardi. Often referred to as the "pink martagon" discovered by Captain Kingdon in 1924. The pink flowers are fragrant and carried on 2-5 feet stems. Flowers in late July. Plant 5 inches deep, preferably where it can have a little shade. Bulbs are small	1.50	
Washingtonianum. A beautiful Pacific Coast lily flowering in early June. The fragrant flowers open white, turning purplish pink as they age, 15 or more flowers are carried on good		

Each Doz.

stems. This variety should be given a well sheltered position or winds will spoil the lovely but rather fragile flowers.

Extra large bulbs75-1.00 each, 8.00-10.00 doz.

Willmottiae. Miss Willmott's lily is vigorous and hardy, attaining when established a height of 5—6 feet and carrying up to 30 flowers per stem. The recurving flowers are of a vivid reddish orange color and appear about mid-July. The foliage is graceful and the plant of a very refined appearance.

	Each	Doz.
Extra large bulbs60	7.00
Strong flowering size50	5.00

Willmottiae unicolor (see *Sutchuenense*).

Additional to the foregoing *Liliums* we can supply limited numbers of a few other varieties the names of which will be furnished on request.

MOSAIC FREE LILIUMS

But for the virus disease known as Mosaic lily culture would make more rapid progress in the United States. This disease is not peculiar to this country but is in every country where lilies are either cultivated or found in the wild. We offer this year a number of varieties which have been examined by experts and have passed the most rigid tests for traces of Mosaic, these are all strong flowering bulbs.

The following amongst other excellent varieties are offered this season—*Regale*, *Regale Hybrids*, *Crows Hybrids*, *Princeps*, *Shelburne Hybrid*, *Sulphur-Gale Hybrids*, *Creelmanni*, *Centifolium*, *Pride of Charlotte*, *Backhouse Hybrids*, *Auratum* *Platyphyl-lum*, *Longiflorum Giganteum*.

Prices of these varieties will be found in the alphabetical list in this catalogue.

Additional to the lilies listed here we have limited numbers of some other varieties the names and prices of which will be forwarded on application.

LILIUM SEEDS

A great majority of *Liliums* come quite readily from seeds. Some like *regale* and all its hybrids, *Willmottiae*, *Davidi*, *Formosanum*, *Henryi*, *tenui-folium*, *umbellatum*, *candidum* *Salonikae* var., *ama-bile* *concolor*, *longiflorum* and *elegans* will usually germinate within a month. On the other hand *auratum*, *speciosum*, *martagon*, *Marhan*, the *Backhouse* hybrids, *giganteum* *Himalaicum*, and all North American varieties are very slow some requiring as much as 12 months to germinate, some of these will make a small bulb but no leaves the first season.

Sowing may be done under glass, in the home in winter, or in cold frames, or the open about May 1. Rather late fall before sharp frosts is another good time to sow seeds outdoors or in a frame. Started early, *Formosanum* will flower the first season, a number of others will bloom the second season.

Seeds may be sown in either shallow drills or broadcasted, cover not over $\frac{1}{4}$ inch. For soil a mixture of garden soil, sand and either leaf mold or peat moss answers very well.

Unless otherwise priced seeds are 25 cents per pkt.; 12 vars., for \$2.00; larger pkts. for 50 cents and \$5.00 per doz. We will be happy to make up collection of easy germinating varieties for those wishful for a start in raising Lilies from seed.

NEW PRACTICAL BOOK ON LILIES

"Lilies and Their Culture in North America"

By William N. Craig

Covers the Culture of Lilies both in the Garden and Greenhouse, treats over 100 varieties. Profusely

illustrated with full page plates. Covers such points as Lilies in History, Classification of Lilies, Geographical Distribution, Suitable Soils, Manures and Fertilizers, Lime and its Effects, the Value of Mulches, Depths to Plant Lilies, Preparation of Soils, Lilies for Special Permanent Purposes, Lilies for Cutting, Insect Pests and Diseases, Propagation, Lilies for Pot Culture and Forcing, Notes on Varieties.

This, the first work on Lily culture in America, has been warmly praised by the Horticultural press of both America and Europe. 144 pages.

Price \$3.00 postpaid from the Author in Weymouth, Mass., or The Florists Publishing Co., South Dearborn Street, Chicago, Ill.

The Lily Year Book for 1940

Published by the Royal Horticultural Society in England. Contains splendid articles on Liliiums. Finely illustrated. 125 pages with index. Of great value to everyone growing Liliiums. Have a supply of this splendid Year Book and can mail promptly on receipt of orders. Price \$2.00 per copy.

NARCISSUS

No Narcissi will be coming from the European continent this season but happily the cultures of these bulbs in the United States are now of quite large proportions and bulbs of very good quality, having proved satisfactory both for forcing and outdoor culture. With the virtual entire stoppage of European imports, prices were advanced somewhat here but we have kept catalogue prices as low as possible, in some cases below those of 1940. On some varieties stocks are not very heavy and will be exhausted before the selling season is long under way.

We handle only the highest quality of daffodil bulbs and an inspection of our stock is cordially invited, also a visit to our beds while flowering in late April and through May.

DAFFODIL YEAR BOOK

We have for sale copies of the splendid Daffodil Year Book for 1940 of the Royal Horticultural Society of England, this is well illustrated and full of thoroughly practical articles. Price \$2.00 per copy postpaid.

CLASSIFIED LIST OF DAFFODIL NAMES

This very useful book is published by the Royal Horticultural Society and contains full particulars of the Society's Classification of Daffodils and arrangements for the Registration of Daffodils. Lists some 6,000 varieties. We have a few copies left which will be sent postpaid for 75 cents each.

LIST OF LARGE TRUMPET NARCISSUS

	Doz.	100
Aerolite. A beautiful variety with deep golden trumpet and primrose perianth, an outstanding daffodil ..	1.75	13.00

Campernelle Rugulosus flore pleno. A fully double form, very pleasing..	.70	5.50
Golden Sceptre. Yellow, very large golden cup, extra fine90	7.00
Orange Queen. Rich deep orange, very distinct, a splendid grower85	6.50
Canaliculatus. (See Rock Garden daffodils.)		
Juncifolius. (See Rock Garden daffodils.)		

ROCK GARDEN SECTION

Virtually all of these varieties are suitable for the rock garden in addition to the sweet jonquils and some others already listed. Some like Queen of Spain, Salmonetta, William Goldring, W. P. Milner and Thalia are also fine for naturalizing where grass is not too coarse. Cover bulb 6—8 inches deep for best success. Many failures are due to too shallow planting.

	Each	Doz.
Bulbocodium Citrinus. Beautiful pale citron flowers 6—8 inches high, likes a damp position and enjoys a soil with peat and leaf mold	\$.15	\$1.50
Bulbocodium Conspicuous. Rich golden yellow of hoop petticoat like form and fine rush like foliage, likes sandy peat15	1.50
Canaliculatus. Dainty little gem, give full sunshine. Heads of 3—4 flowers have white perianths and yellow cups, very fragrant15	1.50
Cernuus. A very old little daffodil. Lovely nodding flowers, perianth and trumpet silvery white, an early bloomer25	2.50
Circlet. Flat creamy white perianth, petals touching and overlapping, fine poeticus like disc covering $\frac{1}{3}$ the area of the petals40	4.00
Cyclamineus. Rich yellow trumpet, perianth reflexed like a cyclamen. Likes a moist location and a sandy peaty soil30	3.00
Cyclamineus February Gold. A hybrid from cyclamineus, perianth golden yellow, trumpet tinged with orange	.20	2.00
Glitter. Perianth and cup deepest golden yellow with glittering red edge. A choice little mite on an 8 inch stem15	1.25
Gracilis. Dainty yellow variety20	2.00

	Each	Doz.
Johnstoni Queen of Spain. Pure canary yellow, gracefully nodding trumpets of small size on 9 inch stems25		2.50
Jonquilla Simplex. True sweet scented jonquil75 doz.,	6.00 per	100
Jonquilla Simplex Flore-Pleno. Double form of above 1.00 doz.,	7.50 per	100
Juncifolius. A miniature rush leaved daffodil, 4—5 inches in height, small rich very fragrant yellow flowers... .25		3.00
Minimus. Smallest of all trumpet daffodils and the first to flower. We had blooms fully expanded on February 25 outdoors in 1939, only 3 inches in height with pure golden trumpets. Succeeds well in loam30		3.00
Minor. A very scarce variety, grows 6 inches high, golden yellow perianth gracefully twisted, trumpet golden30		3.00
Moschatus of Haworth. A charming little daffodil from the Pyrenees, snowy white with a drooping perianth, likes a little shade35		3.50
Nanus. A miniature golden trumpet daffodil 4—5 inches high, about intermediate between minimus and minor in size, very early30		3.00
Queen of Spain (Johnstoni). Lemon trumpet and perianth, a very graceful little flower25		2.50
Rockery Beauty. A lovely little miniature trumpet shaped daffodil, white perianth and full yellow trumpet20		2.00
Salmonetta. Charming little Leedsii with white perianth and salmon tinted cup, often carries twin flowers10		1.00
Triandrus Albus (Angels Tears Narcissus). Snow white nodding flowers, like rather gritty compost20		2.00
Triandrus Agnes Harvey. Suggests albus but with tinge of apricot20		2.00
Triandrus Concolor. Like triandrus albus but creamy yellow25		2.50
Triandrus Moonshine. Resembles Thalia but smaller30		3.00
Triandrus Thalia. Exquisite variety, one of the most lovely of the whole daffodil family. Carries 3—4 flowers per stalk and usually two stalks per bulb. Should be in every garden20		2.00
W. P. Milner. A charming pure white free blooming variety, naturalizes well20		2.00
William Goldring. The "swans neck" daffodil, primrose passing to white and very graceful, quite a robust grower, but its habit makes it fit in well in the rock garden20		2.00

MIXTURES OF NARCISSI FOR NATURALIZING PURPOSES

Choice Mixture All Types,

.60 doz., 4.50 per 100, 40.00 per 1,000

Soleil d'Or. Rich golden yellow, very fragrant, can be used in same way as the Paperwhites	1.00	7.50

TULIPS

No Tulips will reach America this year from the European continent but from Great Britain will come a greatly increased number as compared with 1940, also there are larger home cultures of these so that our gross total of bulbs to be offered may double that of last year. However Tulip bulbs from both sources will not reach half the number imported from Holland in peace time. Bulbs produced both here and abroad are running rather smaller than usual owing to intense heat and drought during the growing season but all will bloom well. It is a well known fact that extra big Tulip bulbs flower no better, if as well, as those of a smaller size.

Additional to the varieties which we have in goodly numbers we are listing others grown here in Weymouth of which we have more limited supplies, we will be pleased to quote prices on these to anyone interested.

Due to war risks and other causes prices on all Tulips are advanced and there is the possibility that some imports might not reach us, but all bulb imports from Great Britain are coming in much better than a year ago.

DARWIN TULIPS

	Doz.	100
Afterglow. Deep rose-orange with salmon edges	\$.85	\$6.50
Baronne de la Tonnaye. Rose shaded blush, very popular85	6.50

Collection of Eight Distinct Varieties		2.50
Fine Mixture		2.50

CYCLAMEN, HARDY TYPE

These delightful little bulbous plants are hardy in New England in a well drained rockery or border where they receive a fair amount of shade. Plant not over 4 inches deep in rather gritty soil to which plenty of leaf mold has been added. They are excellent also in a cold frame and make charming little house plants.

Europaeum. Crimson sweet scented flowers in late summer, with pretty silver marked foliage	\$.50	\$5.50
Neapolitanum. Rosy pink flowers followed by large handsome silver marbled foliage popularly known as the "Ivy leaved Cyclamen"50	5.50

EREMURUS (FOXTAIL LILY)

We have a fine collection of these strikingly beautiful stately and remarkable plants from Central Asia which flower in June and July. Colors include pure white, pink, golden, sulphur yellow, and orange. Best planting time is September until early November. Plants are of easy culture. Spikes attain a height of 5—10 or more feet. Give good drainage and a soil rich in humus with plenty of sand added. Prices are for strong flowering plants.

Bungei. Golden yellow, late bloomer, dwarfer than other varieties	\$1.00	each
Elwesianus. Very robust soft pink variety	1.50—2.00	each
Elwesianus Albus. Lovely pure white	2.00	each
Himalaicus. Grand waxy white variety ...	2.00	each
Him-Rob. A charming hybrid	2.00	each
Isobel. Pink, orange shading	2.00	each
Moonlight. Large soft yellow	2.00	each
Rosalind. Charming bright pink ...	2.00—2.50	each
Robustus. Rich rosy pink, very vigorous	1.50—2.00	each
Shelford. Light brownish orange ..	1.50—2.00	each
Tubergeni. Rich yellow, late bloomer	2.50	each
Warei. Superb new hybrid	2.50	each
White Beauty. Lovely pure white, vigorous	2.50	each

ERANTHIS (WINTER ACONITE)

Hyemalis. The best known variety. Soak roots for a few hours before planting this will ensure much better results60 doz., 4.50 per 100

FREESIA

One of the most pleasingly scented of all bulbous flowers, excellent for house culture.

	Doz.	100
Golden Daffodil. Very large golden yellow	\$.50	\$4.00
Pink Beauty. A giant rosy pink flower60	4.50
Elders Giant White. Extra fine pure white60	4.50
Purity. Immensely popular white40	3.00
Wisteria. Deep bluish lavender60	4.50

FRITILLARIA

The following varieties are suitable for naturalizing or use in the Rock Garden but can also be grown in pots for winter flowering.

	Each	Doz.
Lanceolata. Dark purple mottled greenish yellow	\$.10	\$1.00
Liliacea. White bell-shaped flowers, veined green15	1.25
Pudica. Brilliant yellow bells on stiff stems10	1.00

	Each	Doz.
Purdyi. White tinged purple, lovely variety10	1.00
Recurva. Very striking, bright red outside and rich yellow spotted red within, likes shade15	1.25
Thunbergi. A Japanese variety, bell-shaped white flowers with green veining15	1.25
Note. We regret inability to supply any <i>Fritillaria meleagris</i> or <i>imperialis</i> this season.		

GALANTHUS (SNOWDROP)

	Doz.	100
Elwesii. The largest and finest of this family	\$.50	\$4.00
Nivalis Simplex. The old-fashioned single snowdrop, increases finely50	4.00
Imperati Atkinsii. A magnificent Snowdrop, large snow white flowers with very long petals ...25 each, \$3.00 per doz.		

HYACINTH

We are unable to supply any of the large flowered (Dutch) Hyacinths this season, a few American grown bulbs are offered but they are small and the price excessively high.

IRIS

All of the undermentioned bulbous Iris prove hardy in New England. They need good drainage and should be planted an average depth of 4 inches. *Reticulata* blooms in March, followed in very early June by the Dutch, later come the Spanish and lastly the lovely richly colored English varieties, these latter immediately precede the Japanese Iris.

TINGITANA HYBRIDS

Wedgewood. Beautiful Wedgewood blue, early flowering, perfectly hardy	\$.75	\$6.00
------------------------------------------------------------------------------------	--------	--------

SCILLA (SQUILL)

	Doz.	100
Siberica. Bright blue, grows in sun or shade	\$.75	\$6.00
Siberica Alba. Pure white flowers75	6.00
Siberica Spring Beauty. Brilliant rich blue, larger and far superior to type	1.50	
Campanulata Sky Blue. Lovely deep blue75	6.00
Campanulata Coerulea. The "Spanish Bluebell"75	6.00
Campanulata Alba. Pure white75	6.00
Nutans Coerulea (English Bluebell) ..	.60	4.50
Nutans Alba. Pure white60	4.50
Scilloides (Formerly Pusckinia) Libanotica. Blue with white midribs, rather late bloomer, very striking..	.75	6.00

STERNBERGIA

	Doz.	100
Lutea. A splendid fall flowering hardy bulb, carries rich golden yellow crocus-like flowers. Plant 8 inches deep, good in rock garden	\$1.50	\$11.00

VELTHEIMIA

Viridifolia. A very handsome and striking Cape bulb, use single bulbs to 6 or 7 inch pots. The spikes 15-18 inches high rise from a rosette of showy, bright green shiny leaves and 40-60 reddish tubular flowers are carried on each spike. A grand house plant and attracts attention at every flower show.

Extra large flowering bulbs

.50-.75 each, 5.50-8.00 doz.

ZEPHYRANTHES (FAIRY LILY)

Can be grown in pots for flowering in spring or early summer or planted out to flower in summer or early fall. The lovely flowers are produced over a long season.

	Doz.	100
Ajax. Pure yellow	\$1.00	\$7.50
Candida. Snow white75	6.00
Rosea. Clear rosy pink	1.50	10.00

HELLEBORUS (CHRISTMAS ROSE)

We have a fine stock of strong plants of these lovely plants which can be moved successfully in fall or early spring. They require moderate shade and enjoy a soil containing plenty of humus with a little lime added. Water in very dry weather and leave plants undisturbed for a number of years for best results.

	Each	Doz.
Niger Praecox. A dwarf form of the true Christmas rose	1.00	10.00
Niger Altifolius. A taller and better form than praecox.		
	1.00-2.00 each, 10.00-22.50 per doz.	
Niger Multiflorus. The freest blooming variety we have grown	1.50-2.00 each	
Orientalis. The "Lenten Rose", blooms in spring carrying many flowers to a stalk	1.00-2.00 each, 10.00-22.50 doz.	
Orientalis Hybrids. These come in quite a range of pleasing colors	1.00-2.00 each	
Viridis. More finely divided leaves than the other hellebores. Heads of rich green flowers	1.00	10.00

HARDY CYPRIPEDIUMS (LADYSLIPPERS)

We handle a large number of these lovely hardy plants. Fall is much the best season for planting them. All require shade.

Acaule. The well known "Moccasin Flower" thrives well under pine trees but will do well where pines are not growing25-.50-1.00 each
Acaule alba. Lovely pure white form of which we now have a nice stock50 each

Candidum. The pure white ladyslipper is one of the rarest varieties. We have a limited stock	1.50 each
Arietinum. The "Ramshead Ladyslipper" while carrying small flowers is very attractive. This variety is scarce75 each
Parviflorum. Bright yellow small flowered variety25-.50-1.00 each
Pubescens. A beautiful and very persistent variety, with lovely yellow flowers25-.50-1.00 each
Spectabile (Reginae). The "Royal Ladyslipper" is the tallest growing, latest blooming and most noble of the family. It likes more moisture than any other variety25-.50-1.00 each
We have some extra big clumps at	2.00 each

The price of the Cypripediums depends on the number of "pips" in each. These are the embryo flower spikes.

SOME INTERESTING NATIVE MATERIAL FOR FALL PLANTING

	Each	Doz.
Aquilegia Canadense. Fine for naturalizing25	2.50
Asarum Canadense. Canada Wild Ginger20	2.00
Caltha Palustris. Marsh Marigold ..	.20	2.00
Cimicifuga Racemosa. Cohosh Bugbane, extra strong25	2.50
Claytonia Virginica. Virginica Spring Beauty20	2.00
Clintonia Borealis. Bluebead20	2.00
Cornus Canadensis. Bunchberry25	2.50
Dodecatheon Meadia. Shootingstar ..	.20	2.00
Epigaea Repens (Trailing Arbutus)... Established plants50-1.25	each
Gentiana Andrewsii. Closed Gentian ..	.25	2.50
Hepatica Acutiloba. Sharplobe Hepatica20	2.00
Hepatica Triloba. Roundlobe Hepatica ..	.20	2.00
Iris Cristata. Crested Iris25	2.50
Lobelia Cardinalis. Cardinal flower ..	.25	2.50
Lobelia Syphilitica. Blue Lobelia25	2.50
Lysimachia Nummularia. Moneywort ..	.25	2.50
Potentilla Tridentata. Wineleaf Cinquefoil25	2.50
Mitchella Repens. Partridgeberry. Large clumps25	2.50
Sisyrinchium Angustifolium. Blue-eyed Grass20	2.00
Smilacina Racemosa. False Solomon's Seal20	2.00
Sanguinaria Canadensis. Bloodroot ..	.20	2.00
Sanguinaria Canadensis Flore-Pleno. Double Bloodroot. True double flowering bloodroot. Stock limited. Attracted great attention in our Gold Medal Exhibits at the great Boston Spring Exhibitions	1.50	
Viola Blanda. Sweet white violet25	2.50
Viola Pedata Bicolor. Two color bird-foot violet25	2.50

TRILLIUMS

Erectum. Purple Trillium.

Grandiflorum. Great snowy Trillium.

Nivale. Nodding white Trillium.

Recurvatum. Purple Prarie Trillium

Stylosum. Rosy Trillium.

Undulatum. Painted Trillium.

Prices of all Trilliums, .10 each, 1.00 doz., 7.50 per 100.

ERYTHRONIUMS

	Doz.	100
Albidum. White troutlily	1.00	7.50
Americanum. Common troutlily	1.00	7.50
Giganteum. An Oregon variety with large creamy yellow flowers and beautifully mottled foliage	1.00 per doz.	
Grandiflorum. Bright buttercup yellow flowers on 12-18 inch stems, leaves are unmottled	1.00 per doz.	
Rose Beauty. Dainty rose pink flowers, an early bloomer and one of the best	1.00 each	

NOTE: Plant the Erythroniums in shade, to partial shade 3 inches deep, and 4 inches apart. A mulch of peat moss will assist in holding moisture needed by them.

HARDY FERNS

Of these we have a fine selection in established plants, list on application, .20 each, 2.00 per doz.

Note: Many of our native plants are established stock not to be confounded with the collected plants largely offered which take some time to establish.

HARDY HERBACEOUS PERENNIALS AND ROCK PLANTS

Of these we have a large collection including many unusual varieties and novelties. Full list will be found in our Spring Catalogue issued in February each year.

HARDY ROSES

Of these we carry over 150 varieties in all types. Fall planting of these after October 15 gives splendid results in New England.

CHOICE FLOWERING SHRUBS AND EVERGREENS

We carry a number of rare and unusual Deciduous Flowering Shrubs. Have fine collections of Azaleas, Hybrid and native Rhododendrons, American and Chinese Dogwoods, Ilex, and other interesting material. All of these will be found listed in our Spring Catalogue.

CRANCOVER

The new winter mulch, easily applied, looks neat, does not need anything to hold it in place. Far superior to hay, leaves, straw and other mulches all of which will blow away unless held in position. Can be stacked up and used a second and third year if desired. After trying a number of other mulches, all have been discarded in favor of CRANCOVER as it lays lightly over the plants, diffuses the light about them, does not pack down and start decay as other mulches do and has a neat appearance in the garden.

We can furnish CRANCOVER in November in convenient sized bales at \$2.25 each, also in truck load lots where larger amounts are wanted.

SCOTCH PEAT MOSS

At last after trying various brands of Peat Moss we have found one which fills the bill admirably. It is not too fine, is not so dust dry and tightly packed that it is difficult to break up, contains just enough moisture to make handling it a real pleasure and to know that in buying and using it, Scotland, the romantic land of Lochs, Moors, Heather, and Sturdy People who value Liberty and will fight to the death to preserve it, will be benefited. We have a good supply of this Peat Moss on hand and feel sure that anyone trying a bale will want more. For mulching, mixing in the soil outdoors, adding to potting soil indoors, for packing tender bulbs in for the winter, for incorporating in lawns which dry out badly, for making a compost suitable for Rhododendrons, Azaleas, and many other plants, nothing is better than Scotch Peat Moss.

Price for single bales, \$4.50. 10 bale lots, \$42.50.

SCREENED PURE OAK LEAF MOLD

Invaluable for many horticultural purposes, \$1.00 per bushel, \$2.50 per 2½ bushel bag.

We carry in stock also Pulverized Sheep Manure, Driconure, Pure Ground Bone, Organo Fertilizers, and other Plant Foods.
